Message from the Editors

The present 4 (1) issue of Biomath Communications contains the following original research article:

- Nikolay Kyurkchiev, A new transmuted cumulative distribution function based on the Verhulst logistic function with application in population dynamics

The Review communication section includes three original review papers as follows;

- Gurgen Dallakyan, Some Generalizations of Logistic Model

- Ganka Kamisheva, Nestor Marcoffs Contribution to Bulgarian Physics and Mathematics Education

- Nikolay Kyurkchiev, The parallel from Dr. Anastasopoulos' Legend-Classicatory of Diseases - Ancient Hospital of the Anchialos-Mesembria Hospital (1882–1883) to a contemporary European Short List of Disease Causes (2017)

The present issue includes three short communications in the section Biomathematics News, Announcements and Resources, they are devoted to various conferences and events:

- Fabienne Jezequel, Jean-Luc Lamotte, Professor Rene Alt passed away on 28th April 2017

- Nikolay Kyurkchiev, S. Markov, 230th Anniversary of the birth of Jan Purkyn (1787–2017)

- Peter Rashkov, Reporting from BIOMATH 2017, Kruger Park, South Africa

The abstracts of the conference Biomath 2017 are published in a separate supplement:
Biomath Communications Supplement (online version only)
